

Infosys Cloud Transformation & AI Modernization Capability

Document ID: INF-SALES-ASSET-2026-Q1

Department: Sales & Global Client Solutions

Effective Date: January 15, 2026

Confidentiality: Client-Facing / Sales Approved

1. Enterprise Value Proposition

Infosys Cloud & AI Transformation Services empower Global 2000 enterprises to accelerate digital modernization. By pairing decoupled cloud architectures with governed Enterprise GPT solutions, organizations achieve up to 40% reduction in operational search latency.

2. Core Service Offerings

Our capabilities encompass Legacy Application Refactoring, Cloud-Native Microservices Migration, Generative AI Integration, Managed Security Operations, and Enterprise Knowledge Graphs.

3. Case Study & ROI Impact

For a leading global financial institution, Infosys deployed a multi-department RAG Knowledge Assistant that unified HR, Engineering, and Compliance data, resulting in \$2.4M annual cost savings in IT service desk operations.
