

Standard Operating Procedure: Severity-1 Incident Escalation

Document ID: INF-DEL-SOP-2025-09	Department: Delivery Operations & Reliability
Effective Date: October 15, 2025	Confidentiality: Confidential / Operational

1. Purpose & SLA Thresholds

This SOP establishes emergency response pathways for Sev-1 incidents causing critical business impairment or system downtime across enterprise production environments. Sev-1 outages require acknowledgement within 15 minutes by the On-Call Incident Lead.

2. Bridge Activation & Triage

Upon confirmation of a Sev-1 outage, the Incident Commander must immediately initialize the Emergency Bridge Call and notify Domain Delivery Heads. A dedicated Slack/Teams war room must be provisioned within 20 minutes.

3. Root Cause Analysis (RCA) & Post-Mortem

A preliminary Incident Communication Report must be published within 2 hours of resolution. A comprehensive Root Cause Analysis (RCA) document must be finalized and reviewed by Delivery Leadership within 5 business days.
